Dumping and Subsidizing

FINDING

Inquiry No. NQ-2017-004

Copper Pipe Fittings

*Finding issued
Friday, May 25, 2018*

IN THE MATTER OF an inquiry, pursuant to section 42 of the *Special Import Measures Act*, respecting:

COPPER PIPE FITTINGS

FINDING

The Canadian International Trade Tribunal (the Tribunal), pursuant to the provisions of section 42 of the *Special Import Measures Act*, has conducted an inquiry to determine whether the dumping and subsidizing of pressure pipe fittings and drainage, waste and vent pipe fittings, made of cast copper alloy, wrought (or “wrot”) copper alloy or wrought copper for use in heating, plumbing, air conditioning and refrigeration applications, originating in or exported from the Socialist Republic of Vietnam, restricted to the products enumerated in the attached Appendix, have caused injury or are threatening to cause injury to the domestic industry.

This inquiry follows the issuance by the President of the Canada Border Services Agency of a preliminary determination dated January 25, 2018, and of a final determination dated April 25, 2018, that the above-mentioned goods have been dumped and subsidized.

Further to the Tribunal’s inquiry, the Tribunal hereby finds, pursuant to subsection 43(1) of the *Special Import Measures Act*, that the dumping and subsidizing of the above-mentioned goods originating in or exported from the Socialist Republic of Vietnam have caused injury to the domestic industry.

APPENDIX

Products Covered by the Tribunal's Injury Finding

1. The table to this appendix lists the copper pipe fittings that are covered by the Tribunal's finding.
2. Copper pipe fittings are identified in terms of imperial measurement, i.e. inches. However, the metric equivalents of the imperial measurement are also covered by the Tribunal's finding. The term "metric equivalent" refers to those fittings that are soft-converted equivalents of the imperial-sized fittings and does not include fittings made specifically in metric dimensions.
3. Copper pipe fittings are identified either as a wrought product or as a cast product. Where an asterisk ("*") follows a specific copper pipe fitting description, it indicates that both the wrought product and the cast product are covered by the finding.
4. Copper pipe fittings are identified in terms of nominal size. Plumbing and heating fittings are marked according to nominal sizes that correspond to the inside diameters, while fittings for air conditioning and refrigeration are based on actual outer diameter sizes. The Tribunal's finding also includes copper pipe fittings that are described in terms of their outside diameter size. To determine the nominal size of a fitting that is measured in terms of its outside diameter size, always subtract 1/8 inch from the outside diameter size.
5. Copper pipe fittings are identified using the following list of abbreviated terms:

Abbreviation Chart			
C	Copper Tube Cupped End or Sweat End	LT	Long Turn
M	Male NPT Thread	MJ	Mechanical Joint
FE	Female NPT Thread	DWV	Drainage, Waste, Vent
SJ	Slip Joint End	TY	90° Drainage Tee
FTG	Fitting End (Street End)	Y	45° Drainage Tee
