## DETERMINATION

Preliminary injury inquiry  
PI-2025-008

Forged Grinding Media

*Determination issued  
Wednesday, March 11, 2026*

IN THE MATTER OF a preliminary injury inquiry, pursuant to subsection 34(2) of the *Special Import Measures Act*, respecting:

**FORGED GRINDING MEDIA**

**PRELIMINARY DETERMINATION OF INJURY**

The Canadian International Trade Tribunal, pursuant to the provisions of subsection 34(2) of the *Special Import Measures Act* (SIMA), has conducted a preliminary injury inquiry into whether there is evidence that discloses a reasonable indication that the dumping and subsidizing of forged or stamped steel grinding media in spherical or ovoid shape (“ball”), with a nominal diameter of 25 millimetres (1 inch) or greater up to and including 160 millimetres (6.25 inches), produced through the forging or stamping method and originating in or exported from the People’s Republic of China (the subject goods), have caused injury or retardation or are threatening to cause injury, as these words are defined in SIMA.

This preliminary injury inquiry follows the notification, on January 9, 2026, that the President of the Canada Border Services Agency had initiated investigations into the alleged injurious dumping and subsidizing of the subject goods.

Pursuant to subsection 37.1(1) of SIMA, the Tribunal determines that there is evidence that discloses a reasonable indication that the dumping and subsidizing of the subject goods have caused injury to the domestic industry.
